

# GEAR POLISHER

# SI-2415

**The SUPER POLISHER SI-2415 enables beginners to secure fresh polishing services without buffs remaining, which needed special skills for complicated works.**

### Regulator Dial

### Throttle Lever

### REAR EXHAUST Oil Filter Bag

## SI-2415

- Regulator dial : Number of rotation adjustment.
- Throttle lever : Rotation start switch.
- Strong motor built-in 1,200RPM is most suitable for polishing.
- Handle exhaust not to interrupt operation and with oil filter bag attached. It prevents oil or mist from scattering, and shows noise suppression effect.
- Ergonomic composite grip for comfort and reduced vibration and exhaust silent for noise control.

### Buffs don't remain!

Irregular and fine motion approximate to manual services do not leave buffs.

### Easy to handle in smooth motion!

Stable and low specific gravity design enables operators not to feel fatigue.
